

Ujala Saroj

Kanpur, India — +91 7307636537 — Email — LinkedIn — GitHub

Professional Summary

Final-year B.Tech student in Computer Science (Artificial Intelligence & Machine Learning) with experience building full-stack web applications using React.js, FastAPI, Flask, and REST APIs. Skilled in backend development, scalable API design, database systems, and modern frontend development with strong problem-solving and software engineering fundamentals.

Education

Maharana Institute of Professional Studies, Kanpur

B.Tech – Computer Science (Artificial Intelligence and Machine Learning) August 2023 – Present

Class XII (2023) – 84%

Class X (2021) – 87.5%

Project Experience

EduMentor AI – Intelligent Learning Assistant

- Developed scalable backend services using FastAPI and REST APIs for AI-powered learning workflows.
- Designed modular API architecture for question generation, evaluation, progress tracking, and adaptive recommendations.
- Integrated LLM-based response generation for personalized learning experiences.
- Optimized backend response handling and structured data flow for maintainability and scalability.

Zentra – Student Community Platform

- Developed responsive community platform frontend using React.js and Redux Toolkit.
- Built issue posting and threaded discussion modules with dynamic state management.
- Integrated REST APIs for real-time content updates and user interactions.
- Improved user experience through reusable UI components and optimized rendering.

Credit Card Fraud Detection System

- Built and deployed fraud detection backend using Flask REST APIs.
- Processed and analyzed 280k+ transaction records with optimized preprocessing pipelines.
- Implemented model-serving architecture for real-time fraud prediction requests.
- Evaluated system performance using ROC-AUC, precision, and recall metrics.

Technical Skills

Programming: Python, JavaScript, C++, SQL

MERN Stack: MongoDB, Express.js, React.js, Node.js

Frontend: React.js, Redux Toolkit, HTML, CSS

Machine Learning: Scikit-learn, Supervised Learning, Unsupervised Learning, Feature Engineering, Model Deployment

Data Tools: Pandas, NumPy, Matplotlib, Seaborn, Tableau

Tools: Git, GitHub, Streamlit

Certifications

Introduction to Database Systems – NPTEL, IIT Madras

AI Agents Intensive Course – Google

Machine learning and artificial intelligence by Udemy

TCSiON Career Edge - Young Professional (2 weeks)

Artificial Intelligence Fundamentals, IBM SkillsBuild

Data Visualization Using Python, IBM

Postman - Postman API Fundamentals Student Expert

Achievements

Arcade Novice at Google Cloud Arcade Facilitator Program 2025 - Cohort 1

Qualified Round One, Adobe India Hackathon, 2025

Contributor, Social Summer of Code Season Four
